

# Reading Questions

Sumit + Elena  
CS 286r · Fall 2011

Practical Voting Rules  
Wednesday, October 5th

## 1 Discuss

Comment on this paper. See the course guidelines for submitting comments for some suggested questions.

## 2 Examples with partial information

Provide a few examples of voting systems that only take into account partial information. In what scenarios does it make sense to use a greedy algorithm?

## 3 Did we convince you?

Comment on the assumptions of the paper. Are they reasonable? How convincing are the empirical proofs?

## 4 A “quality” winner

What do Kalech et al. mean when they refer to the quality of a winner? What characteristics of a voting system with partial information produce a higher quality winner?
